the project .

A young family moving into this apartment asks for re-conceive the two kids bedroom and the living area.

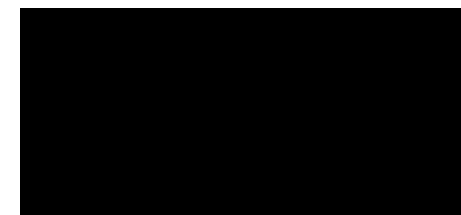

The main task is to organise the first room in a useful way and the living space as a multi-functional environment where:

- 1) kids can do their homework and play together, according to the furniture layout
 - 2) the family can have dinner in a pleasant atmosphere
 - 3) parents can watch TV while sharing the same space with their kids at night.
- Our answer tries to achieve these goals, in fact choosing an appropriate folding table and stackable chairs the room can change its function during the day (see the diagram and view C, showing the furniture flexibility.)

We can identify the chromatic palette with the colours of Rovereto, a small town in Trentino region (Italy.)

Although it is in an apparent “cold” mountain area, the town is quite colourful and creativity finds expression in the internationally renowned Museum of Modern and Contemporary Art (MART.)
